Trans. of Akademiya Nauk SSSR. Geofizicheskii Institut. Trudy, 1953, v. 20(147) p. 20-36.

DESCRIPTORS: *Wave analysis, *Vibration, Propagation, *Elasticity.

Sinusoidal vibrations excited by a point source in an ideally elastic medium consisting of a layer lying between two semi-spaces are considered. It is shown that the main part of the displacement remote from the source consists of waves of a specific type. Some of the properties of these waves are investigated. (Author)
